ACADEMIC PROJECTS :

1. Title: Hotel Booking Website- An ultimate platform to discover & book an Ideal Stay.

Description: The “Hotel Booking Website” is an platform designed to streamline the process of finding and reserving accommodations. Our user-friendly website offers real-time availability, competitive pricing, and a range of filtering options to help users find the perfect stay. Features include detailed hotel reviews, high-resolution photos, and an intuitive booking interface.

2. Title: Java Based Project on Text Editor Using Java Swing

Description: This Text Editor is a Graphical user interface (GUI) system that allows user to easily create and save the text file or to open and modify or read the text file using buttons.

3.Title: Research Paper – Artificial Intelligence in Our Daily Life

Description: This research paper explores the role of Artificial Intelligence (AI) in our daily lives, examining its applications, benefits, and challenges. It delves into how AI technologies—such as machine learning, natural language processing, and robotics—are transforming various aspects of everyday activities, from personal assistance and healthcare to transportation and entertainment.
